Art Unit: 1774

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to heat-sensitive recording material and process of making the same wherein a specific color developing mixture is employed, classified in class 503, subclass 216.
 - II. Claim 7, drawn to a process of making a heat-sensitive recording material wherein a specific sensitizer is employed, classified in class 503, subclass 209.

2. The inventions are distinct, each from the other because:

The recording material of Group I does not require the sensitizer of Group II and the recording material of Group II does not require the developer of Group I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Telephone calls were made to applicants' attorney, Ronald Santucci, on May 18 and 23, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce Hess whose telephone number is (571) 272-1525. The examiner can normally be reached on Monday to Friday 9 Am to 5 PM.
